Southern Runway Opening Restrictions

A dual runway config is to be used during events, periods of heavy traffic to minimise delay (busy evenings, weekends) and during published times:

- Summer: Mon-Fri (0615-2000L); Sat (0615-1600L); Sun (0615-0930L and 1300-2000L)
- Winter: Mon-Fri (0630-1030L and 1600-2000L); Sat (0630-1000L); Sun (1600-2000L)

RWY 05R/23L is not used between 2200-0600L in real life due to planning constraints.

Low Visibility Procedur

LVP are broadcast via ATIS or notified via R/T.

"LVP Cloud" are initiated when IRVR remains above 600m, but cloud ceiling of 200 ft or less.

- Single Runway operations only if easterly configuration.
- Holding point and taxiway restrictions enforced.
- "LVP Visibility" are initiated when the IRVR is less than 600m.
- Single Runway operations only.
- Traffic that has already crossed 23R/05L when LVP Visibility is declared may depart 23L.
- Holding point and taxiway restrictions enforced.
